

**easywork**  
Make IT Easy

**[ COMPANY PROFILE ]**

## Background

We are a group of experienced professional for a dozen years in the world of digital and information technology. In 2009, we agreed to join and establish a place for us to be creative and develop ideas that we cannot make happen when we were working as employee in various national and international companies. We give the name of the container as PT Easywork Indonesia.

## Line of Business

PT Easywork Indonesia is a company engaged in the development of systems that include instrumentation and software, as well as product development.

Services we are offer are:

- Automation.  
Designing and implementation the microprocessor/microcontroller-based electronic instruments for automation such as temperature and humidity control system, lighting, velocity, and so forth including the industrial automation.
- Custom software development.  
Develop software according to client specifications.

## The Vision

Being a system development company, both instrument and software, that is always able to compete and grow healthily.

## The Missions

1. Generate a reasonable income to support the growth and development of the enterprise and provide a satisfactory dividend to shareholders.
2. Developing various types of systems and products both instruments and software associated with market needs with quality and competitive prices through a professional development process for client satisfaction.
3. Giving awards to employees through the provision of adequate welfare, providing a safe work environment, healthy and comfortable, providing opportunities for career development and innovate.
4. Establish partnerships which mutually beneficial cooperation with other parties.
5. Provide genuine concern to the community through job creation, social development and environmental support.
